Iguana delicatissima (Lesser Antillean Iguana). Distribution.

Date of observation: 15 May 2012. Location: Gros îlet, Saint-Barthélemy. Coordinates: 17.90063, -62.86066. Voucher: image. An adult male *Iguana delicatissima* was found hiding under a nest of pelicans by personnel from the Nature Reserve of Saint-Barthelemy. This observation is the first for the species on this small island of 0.9 hectares generally known for its high concentration of seabirds.
